

MATHS LAB

$$V = \frac{4}{3} \pi r^3$$

The mathematics laboratory is a place where anybody can experiment and explore teaching and learning material. It is a place where one can find a collection of games, puzzles, and etc.

The materials are meant to be used both by the students on their own and with their teacher to explore the world of mathematics, to discover, to learn and to develop an interest in mathematics. The activities create interest among students or in anybody who wants to explore, and test some of their ideas, beliefs about mathematics.

Our school has established a well equipped mathematics laboratory. In the lab, the school has introduced and displayed various models. The Lab also contains various project work made by the students for the lab. Using Geometrical Instruments to learn the basic definitions of geometry that of parabola, ellipse etc. Students also learn by doing activities in smart board.

The teachers demonstrates, explain and reinforce abstract mathematical ideas by using concrete objects, models, charts, graphs, pictures, etc.
