

Facebook is a social networking website launched in February 2004 and operated and privately owned by Facebook, Inc. Users can add people as friends and send them messages, and update their personal profiles to notify friends about themselves. Additionally, users can join networks organized by workplace, school, or college. The website's name stems from the colloquial name of books given to students at the start of the academic year by university administrations in the US with the intention of helping students to get to know each other better. Anyone age 13 or older can become a Facebook user. Facebook was founded by Mark Zuckerberg with his college roommates and fellow computer science students in 2004.

Every night we all friends get online and do group chat. Its like hanging out together. For enjoyment we play many games together. Steadily it became essential part of my daily life.
