**General Instructions**

1. This question paper consists of four sections  
SECTION -A (READING)-10 MARKS  
SECTION -B (WRITING) -15 MARKS  
SECTION -C (GRAMMAR)-10 MARKS  
SECTION -D (LITERATURE)-15 MARKS
2. Read each question carefully and follow the instructions.
3. Attempt all the questions in legible handwriting.
4. All the answers must be numbered correctly as in the question paper.

**SECTION -A (READING)****(10 Marks)****1. Read the following passage carefully.**

What is the source of life? All our civilizations came up next to rivers. Over the years, rising populations, growing industrialization and expanding agriculture have increased the demand of water. New technology like borewells and water pumps help us suck water out from great depths beneath the surface of the Earth. At the same time, we don't replenish this water.

(Para-1)

In urban areas, the construction of houses, foot paths and roads leaves very little exposed earth for water to soak in. Forests have been ruthlessly chopped down, hillsides stripped off all their greenery, thus allowing rain water to flow down slopes unchecked. Flood water quickly flows into rivers, which dry up soon after the rain stops. If this water could be held back, it could seep into the ground to recharge ground water.

(Para -2)

The idea of recharging ground water through rainwater harvesting is becoming popular in many Indian cities. Rain water harvesting essentially suggests collecting rain water and storing it for later use. Not only does this stop ground water depletion, it also raises the water level and helps supplement water supply. This artificial recharging stops the drop in ground water levels and conserves the surface water that runs off during the monsoons.

(Para -3)

1.1 On the basis of your reading of the passage, answer the following questions. (1 x 3=3)

- a) What are the different factors for which the demand of water has been increased?
- b) What is the main reason of decreasing ground water in urban areas?
- c) What do you mean by 'rain water harvesting' ?

1.2 Find the word from the passage which means the same as:

(1 x 2=2)

- i) under (Para-1)
- ii) fill up something again (Para-1)

2. Read the following poem carefully.

Pink are the young leaves  
Bright and cool  
As the quiet waters  
Of a jungle pool.

Loud calls the Koel  
From the tree  
At dawn and in the sunlight  
And at the dusk calls he.

Peasants plough slowly  
Earth's dry crust  
Tilling the soil  
Before green blades thrust

Rain falls earthwards  
Wild winds sing  
Bold and fierce yet loved  
Is the Indian Spring.

2.1 On the basis of your reading the poem, answer the following questions by choosing the correct options.
